In this problem we deal with the calculation of stock prices. You need to know the following things about stock prices:

- The *ask price* is the lowest price at which someone is willing to sell a share of a stock.
- The *bid price* is the highest price at which someone is willing to buy a share of a stock.
- The *stock price* is the price at which the last deal was established.

Whenever the bid price is greater than or equal to the ask price, a deal is established. A buy order offering the bid price is matched with a sell order demanding the ask price, and shares are exchanged at the rate of the ask price until either the sell order or the buy order (or both) is fulfilled (i.e., the buyer wants no more stocks, or the seller wants to sell no more stocks). You will be given a list of orders (either buy or sell) and you have to calculate, after each order, the current ask price, bid price and stock price.

Input

On the first line a positive integer: the number of test cases, at most 100. After that per test case:

- One line with an integer n ($1 \leq n \leq 1\,000$): the number of orders.
- n lines of the form “*order_type* x shares at y ”, where *order_type* is either “buy” or “sell”, x ($1 \leq x \leq 1\,000$) is the number of shares of a stock someone wishes to buy or to sell, and y ($1 \leq y \leq 1\,000$) is the desired price.

Output

Per test case:

- n lines, each of the form “ a_i b_i s_i ”, where a_i , b_i and s_i are the current ask, bid and stock prices, respectively, after the i -th order has been processed and all possible deals have taken place. Whenever a price is not defined, output “-” instead of the price.

Sample 1

Input	Output
2	- 100 -
6	120 100 -
buy 10 shares at 100	110 100 -
sell 1 shares at 120	120 110 110
sell 20 shares at 110	120 100 99
buy 30 shares at 110	- 100 120
sell 10 shares at 99	100 - -
buy 1 shares at 120	100 80 -
6	100 90 -
sell 10 shares at 100	90 80 90
buy 1 shares at 80	100 80 90
buy 20 shares at 90	100 - 80
sell 30 shares at 90	
buy 10 shares at 101	
sell 1 shares at 80
